

Price list for laying 6-core optical fiber cable

Summary of Content

The unit price for laying a 6-core optical fiber cable typically ranges from \$1.20 to \$6.00 per foot, depending on installation method, fiber type, and environmental factors.

Material Costs

The raw cost of a 6-core fiber optic cable varies by fiber type and strand count. For small strand counts like 6-core, single-mode fiber costs approximately \$0.10–\$0.50 per foot, while multimode fiber may cost \$0.30–\$1.00 per foot. Bulk purchases can reduce the per-foot price by 15–20% compared to smaller reels, and pre-terminated cables or armored variants increase costs significantly due to factory termination and protective construction .

Installation Costs

The method of installation heavily influences the unit price:

- Open trench (lawn/field): \$0.90–\$1.80 per foot
- Directional boring (road crossings, driveways): \$3.00–\$7.00 per foot
- Aerial (utility poles): \$1.20–\$2.50 per foot
- Indoor plenum or riser ceiling: \$0.80–\$1.70 per foot Additional costs may include conduit installation (\$0.50–\$1.50 per foot), armored protection for direct burial, and LSZH (low-smoke zero-halogen) jackets, which can add \$0.25 per foot .
