

Price of Angle Steel Brackets for Power Cable Trays

Summary of Content

Angle steel brackets for cable trays typically range from \$5 to \$50 per piece, depending on size, material, and finish.

Overview of Angle Steel Brackets

Angle steel brackets are used to support and secure power cable trays in electrical and construction installations. They are made from high-quality steel, often pre-galvanized or hot-dipped galvanized for corrosion resistance, and are available in various sizes and thicknesses to accommodate different tray widths and load requirements. Common types include:

- **Stand-Off Brackets:** Provide clearance from walls or surfaces, typically 50mm to 300mm.
- **G Hanger Support Brackets:** Designed for overhead support of cable trays, trunking, or baskets, available in 100mm, 150mm, and 225mm sizes.
- **Trapeze Support Brackets:** Pre-assembled for quick installation, supporting wider trays with adjustable drop lengths.

Factors Affecting Price

- **Material and Finish:** Hot-dipped galvanized (HDG) or stainless steel (A316/A4) brackets are more expensive than pre-galvanized steel.
- **Size and Load Capacity:** Larger brackets or those designed for heavy-duty loads cost more. For example, a 75mm stand off bracket is generally cheaper than a 225mm G hanger bracket.
