

Price of Damaged Optical Distribution Box

Summary of Content

The cost of a damaged optical distribution box typically ranges from \$50 to \$500 or more, depending on materials, type, and deployment environment.

Factors Affecting Price

Material and Build Quality: Optical distribution boxes made from PC+ABS or high-grade metals (304 stainless steel) are more expensive than standard ABS or ordinary metal boxes. Outdoor-rated boxes with IP65 waterproofing and UV resistance also cost more due to durability requirements . **Type and Capacity:** Prices vary based on whether the ODB is a compact wall-mounted unit, hybrid enclosure, or a fiber distribution hub (FDH). Larger units with more ports or integrated splitters for FTTH networks are more costly . **Repair vs Replacement:** Minor damage, such as a cracked cover or connector failure, may be repaired at a lower cost using replacement cassettes or connectors. However, significant structural damage or aging boxes often require full replacement, which is generally more cost-effective in the long term . **Market and Vendor:** Purchasing from B2B suppliers often provides bulk discounts and technical support, while B2C platforms may offer lower upfront prices but with higher risk of substandard quality .

Typical Price Ranges

- Small indoor wall-mounted ODBs: \$50-\$150
- Outdoor IP65-rated ODBs: \$150-\$300
