

Price of Factory High Voltage Distribution Boxes

Summary of Content

High-voltage complete distribution boxes typically range from \$1,000 to \$10,000 per unit, depending on specifications, features, and customization.

Price Range Overview

The cost of high-voltage distribution boxes varies widely based on voltage rating, amperage capacity, number of circuits, material construction, and integrated safety features. Standard industrial or commercial units generally start around \$1,000–\$3,000 for basic configurations, while advanced or customized units with smart monitoring, remote control, and weather-resistant enclosures can reach \$5,000–\$10,000 or more per unit. Bulk orders or OEM production may reduce per-unit costs, especially for distributors or large-scale projects.

Factors Affecting Price

- **Specifications:** Higher voltage ratings, larger amperage capacity, and more circuits increase cost.
- **Materials:** Premium materials like corrosion-resistant metals, low-induction busbars, and anti-electromagnetic shielding add to the price.
- **Safety Features:** Overload protection, short-circuit protection, ground fault detection, and insulation testing ports enhance safety but increase cost.
- **Customization:** OEM branding, modular designs, top cable entry modifications, and specialized mounting configurations can significantly influence pricing.
