

Price of Steel Stranded Fiber Optic Cable

Summary of Content

Steel-stranded (armored) fiber optic cable typically costs between \$1.15 and \$6.50 per meter, depending on fiber count, type, and environmental rating.

Steel-stranded fiber optic cables, often used for outdoor, direct-burial, or harsh environments, are more expensive than standard indoor cables due to their protective armor and durability. The cost varies based on several factors: 1. Fiber Type and Count

- Single-mode (OS2): \$0.30 to \$2.80 per meter, generally cheaper per strand than multimode, suitable for long-distance transmission .
- Multimode (OM3/OM4): \$1.50 to \$6.00 per foot, used for high-speed, short-distance applications like data centers .
- Higher strand counts increase costs proportionally; for example, a 12-strand cable is cheaper than a 24-strand or 96-strand cable . 2. Cable Construction and Armor
- Steel tape armored cables: \$1.15 to \$6.50 per meter, providing protection against physical damage, rodents, and environmental hazards .
- Armored cables are essential for direct burial or areas with potential mechanical stress, which adds 20-50% to the base cable cost . 3. Jacket Material and Environmental Rating

- Outdoor-rated jackets (PE, UV-resistant) cost more than indoor PVC or LSZH jackets .
- Cables designed for wet, UV-exposed, or high-temperature environments require specialized materials, increasing the price . 4. Bulk vs Retail Pricing
