

Price of cable trays for a building

Summary of Content

Cable tray prices vary by material and type, ranging from approximately \$5 to \$50 per meter, with steel being the most common and cost-effective option.

Cost Overview by Material and Type

- **Steel Cable Trays:** Typically cost \$5 to \$25 per meter. Steel is durable, widely available, and suitable for general-purpose installations in commercial and industrial buildings .
- **Aluminum Cable Trays:** Lightweight and corrosion-resistant, ideal for humid or industrial environments, costing \$6 to \$30 per meter .
- **Fiberglass (FRP) Trays:** More expensive, ranging from \$10 to \$50 per meter, used in aggressive environments where chemical resistance is required .
- **Stainless Steel Trays:** Highly durable and corrosion-resistant, suitable for high-demand or critical installations, generally at the higher end of the price spectrum .

Tray types also affect pricing:

- **Ladder Trays:** Open design, economical, easy to install, and ideal for heavy cable bundles. They are generally less expensive than solid bottom trays .
- **Solid Bottom Trays:** Provide extra protection against dust and environmental hazards, commonly used in hospitals, data centers, or clean rooms, and are more costly due to additional material .
- **Perforated or Wire Mesh Trays:** Lightweight, flexible, and suitable for smaller cables or office/data center applications, often priced lower than solid trays .
