

Prices of electricity meters and distribution boxes

Summary of Content

Replacing a distribution box typically costs \$1,200–\$6,000, while an electricity meter replacement ranges from \$500–\$5,000, depending on amperage, installation complexity, and location.

Distribution Box Costs

The cost of a distribution box (electrical panel) depends on amperage, location, and whether a full upgrade is needed. For a standard 100–125A indoor panel, replacement including labor and materials usually runs \$1,200–\$2,500. A 200A outdoor upgrade with a new meter socket can cost \$3,000–\$6,000. High-end projects, such as smart meters, main-tie panels, or complex wiring, may increase costs further. Labor typically ranges from 6–18 hours at \$75–\$120 per hour, with additional charges for permits, structural work, or conduit rerouting, and regional variations can affect the total price .

Electricity Meter Costs

Replacing an electricity meter box (meter socket) generally costs \$500–\$2,100 for standard residential systems. Larger or high-capacity systems, such as 200A or 400A, or full service upgrades, can reach \$4,000–\$5,000. The meter box itself usually costs \$50–\$500, with extra fittings adding up to \$100. Labor rates for electricians range from \$50–\$130 per hour, plus service call fees of \$100–\$200. Permit fees typically add \$150–\$300 to the total. Adding a second meter for rental units or high-load appliances can cost \$1,400–\$4,700+ depending on complexity .
