

Residential power distribution box equipment

Overview

A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge. A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge. The PDX and TSPE series modular distribution boxes are built for flexible indoor and outdoor applications, offering durable plastic and metal construction for enhanced safety and longevity. With wall-mounted and flush-mounted installation options, they adapt to various settings, ensuring reliable. The world's toughest pole-mounted enclosure! Waterproof IP66 rated socket enclosures. Deep enough to seal with a plug inside, keeping things water-tight while in use. A well-chosen distribution box ensures the safety and efficiency of your household electrical system.
