

Router fiber optic cable turns red

Overview

To fix a red LOS light on your router/ONT, start by checking that the fiber patch cord is firmly clicked into the ONT's PON port and undamaged, then power cycle the device for 30 seconds. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. Sometimes it may be due to a problem with your internet service provider, although you could also be experiencing this issue due to improper configuration of your router, a poorly connected cable, etc. Here. However, a common concern among users is a router flashing red.
