

Router settings for fiber optic networks

Summary of Content

To configure a fiber optic router, connect it to the ONT, access the router's admin panel, input ISP credentials, and optimize Wi-Fi and LAN settings for secure, high-speed internet.

Connecting Your Router to Fiber

- Identify the Optical Network Terminal (ONT): The ONT converts fiber signals into Ethernet for your router .
- Connect the router: Use an Ethernet cable to link the ONT's LAN port to your router's WAN port .
- Power on devices: Ensure both the ONT and router are powered and stable, with indicator lights confirming connectivity .

Accessing Router Settings

- Open a web browser on a device connected to the router.
- Enter the router's default IP address (commonly 192.168.1.1 or 192.168.0.1) in the address bar .
- Log in using the default credentials (often admin/admin) or your customized login .

Configuring Network Settings

- WAN/Internet Settings:
- Select the connection type provided by your ISP (PPPoE, DHCP, or static IP), .
- Enter ISP credentials if required .
