

Safety Inspection of Electrical Distribution Box

Summary of Content

Electrical distribution boxes should be inspected through a combination of visual checks, functional testing, grounding verification, and preventive maintenance to ensure safety and reliability.

Visual Inspection

- **Enclosure Condition:** Check for corrosion, rust, physical damage, and ensure all labels and warning signs are legible .
- **Mounting and Access:** Verify the box is securely mounted, doors close properly, and access is clear with no obstructions .
- **Internal Components:** Inspect for dust, debris, burnt or damaged wiring, and signs of overheating or arcing .
- **Breaker and Switches:** Ensure circuit breakers, switches, and indicator lamps are intact, properly labeled, and free from exposed live parts .
- **Safety Equipment:** Confirm the presence and condition of GFCIs, RCDs, surge protection devices, and nearby fire extinguishers .

Functional Testing

- **Circuit Breakers:** Test operation under load conditions and check for tripped breakers or blown fuses .
- **Grounding System:** Measure continuity and resistance, inspect connections for corrosion, and verify proper bonding between equipment and grounding systems .
