

Selling Industrial Ethernet Switches

Summary of Content

Industrial-grade Ethernet switches are specialized networking devices designed for harsh environments, and selling them effectively requires understanding product types, certifications, and target industries.

Product Types and Features

Industrial Ethernet switches come in various configurations to meet different operational needs:

- **Managed Switches:** Offer advanced traffic control, VLAN, QoS, redundancy, and security features, ideal for complex industrial networks and mission-critical applications (Perle, Advantech, Moxa) .
- **Unmanaged Switches:** Plug-and-play devices requiring no configuration, suitable for simple network expansion at the edge (Maisvch, EtherWAN) .
- **PoE/PoE+/PoE++ Switches:** Deliver power and data over a single cable, supporting IP cameras, wireless APs, and industrial automation devices (Antaira, Advantech) .
- **Fiber Optic Switches:** Provide long-distance connectivity immune to EMI/RFI, ideal for factory floors and outdoor installations (Maisvch, AutomationDirect) .
- **DIN-Rail and Rack-Mount Switches:** Designed for secure installation in control panels or server racks, saving space and simplifying network layout (Maple Systems, FS) .
- **Ruggedized and IP67-rated Switches:** Withstand extreme temperatures, vibrations, and moisture, suitable for railways, wind farms, and outdoor industrial environments (Moxa, Perle) .
