

Senegal Power Cable Tray Construction

Overview

The project involves installing two 225 kV power cables offshore, spanning 16 kilometers each, and six two-kilometer 225 kV cables onshore, connecting Dakar's west and east coasts. In collaboration with our joint venture partner, Enshore Subsea, we joined forces under the Dakar Marine Link initiative to install two subsea power cables. The consortium is said to be a 50/50 joint venture between Eiffage's Benelux subsidiary Herbosch-Kiere and Enshore. Eiffage, through Herbosch-Kiere (Eiffage Benelux subsidiary) in a 50/50 joint venture with Enshore Subsea (a leading UK based subsea engineering company), has signed an EPCI contract with MCA-Sénégal II for the design, manufacture and installation of undersea electrical cables in Dakar, Senegal. No description has been added to this video. Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on YouTube. ECTRAY offer a wide range of perforated cable trays which are fabricated using quality raw material such as Zinc Aluminum Magnesium (ZAM).
