

Shovel fiber optic cable

Overview

When installing fiber optics, irrigation systems and cables, a cable shovel is often used. Our cable shovels are available with or without. A cable shovel is often also called a diepschop or a bananenschop. A cable shovel can be recognized by the narrow blade and the strongly bent socket angle. In northern climates where the frost depth fluctuates, the ground isn't a static tomb; it's a shifting mass of grit and ice that can heave a utility line inches closer to the surface than the. Budco is a stocking distribution company for broadband tools, fiber optic tools and coax cable tools. Since 1970, Budco has provide cable construction tools, cable installation tools, and cable identification tools including fiber optic test equipment and tools for the telecommunications industry. This tool is designed for efficient and precise trenching work, particularly in fiber optic cable installation.
