

Sino-European Steel Cable Tray Price Quote

Summary of Content

Sino-European steel cable trays typically cost between \$10 and \$30 per meter, depending on material, coating, and order quantity.

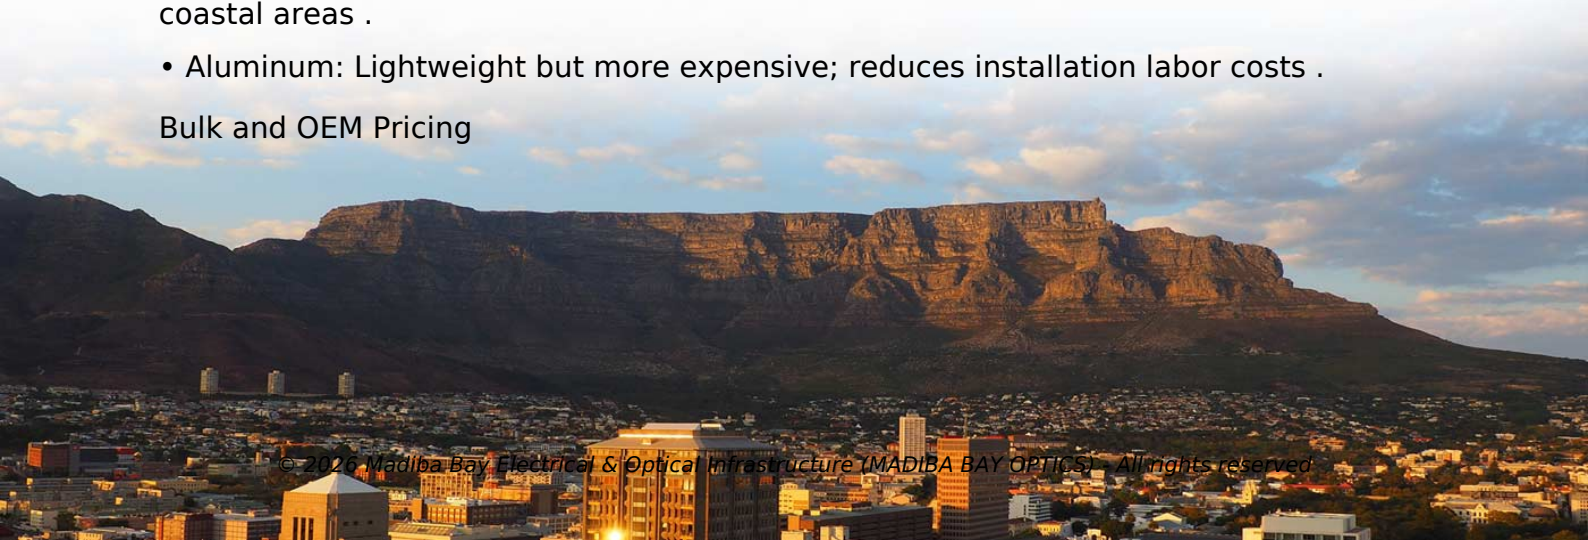

Price Range and Factors

The cost of a Sino-European steel cable tray varies based on material type, surface finish, and supplier. Standard galvanized steel trays are generally the most cost-effective, while stainless steel options are more expensive due to corrosion resistance and durability requirements. The average price per meter for steel trays ranges from \$10 to \$30, with bulk orders often reducing the per-meter cost. Pre-galvanized trays are cheaper, whereas hot-dip galvanized (HDG) trays are more suitable for outdoor or industrial environments and cost more.

Material and Coating Considerations

- Galvanized Steel: Balances cost and durability; suitable for most industrial and commercial applications.
- Stainless Steel: Higher cost; ideal for corrosive environments, food processing, or coastal areas.
- Aluminum: Lightweight but more expensive; reduces installation labor costs.
