

An Intelligent Power Distribution Unit (iPDU), also known as a Smart PDU or Intelligent PDU, is a critical component in modern data center infrastructure. iPDUs serve as a centralized power management solution that enhances the efficiency, reliability, and monitoring capabilities. ABB offers a total ev charging solution from compact, high quality AC wall boxes, reliable DC fast charging stations with robust connectivity, to innovative on-demand electric bus charging systems, we deploy infrastructure that meet the needs of the next generation of smarter mobility. Our trendsetting solutions for smart power distribution support all steps from planning to implementation, optimization and. Cabinet power distribution represents a sophisticated electrical infrastructure solution designed to efficiently manage and distribute electrical power within industrial, commercial, and residential facilities. This comprehensive system serves as the central hub for electrical distribution. When you integrate a Smart Power Distribution Unit with an AIoT platform, you gain the ability to monitor and control cabinet power data at every level—end, edge, and cloud.
