

Spanish 32-core fiber optic distribution box

Overview

SJ-ODB-M11 fiber optical distribution box 32 cores provide cost effective, reliable, and high quality fiber optic connectivity at the point of entry (POE) into a building. It integrates splicing, signal splitting, storage and cable distribution function within a single enclosure for outdoor installation. FDB-32 Series 32 ports Fiber Distribution Box, also called Splitter Distribution Box or Fiber Terminal Box, can be used in FTTH projects and is suitable for corridor, basement, room, and building's outer walls application. Features tool-less installation, IP65 protection, and compliance with IEC, TIA/EIA & RoHS standards. The fiber splitter distribution box supports fiber splicing, splitting, distribution, "three in one" and fiber optic distribution box also offers solid protection. 32 ports Distribution Box is designed for FTTH application, apply for common cable connecting with drop cable / pigtail and optical splitter. ISP-TB-0132 32 Core Fiber Optic Distribution Box Feature: 1. Industry Standard User Interface, with high impact plastic; 2. Its primary functions are to manage, protect, and house the splices and connections of fiber optic cables.
