

Square to Round Fiber Coupler

Summary of Content

A Square to Round Fiber Coupler is an optical adapter that allows square-flanged fiber connectors to be mounted in round panel cutouts while maintaining precise fiber alignment.

Overview

A Square to Round Fiber Coupler is designed to connect fiber optic cables with square flange connectors to panels or devices that have round cutouts. These couplers are commonly used in FC (Ferrule Connector) systems and can accommodate single-mode or multimode fibers with either UPC or APC polish types . The coupler ensures low insertion loss and stable optical performance by using ceramic or bronze alignment sleeves that precisely align the fiber cores .

Key Features

- **Mounting Compatibility:** Square flange connectors can be installed in standard round panel holes, simplifying integration into existing equipment .
- **Alignment Sleeves:** High-precision ceramic sleeves are used for single-mode fibers to ensure accurate alignment, while bronze sleeves are often used for multimode fibers .
- **Connector Types:** Compatible with FC, LC, or SC connectors, depending on the coupler design .
- **Modes Supported:** Available for single-mode and multimode fibers, supporting both PC and APC connections .
