

The fiber optic cable area on the router is red

Overview

The fiber optic cable or main internet cable needs to be pushed in firmly until you hear or feel a click. Follow these steps to check your connections: Sometimes you'll find the cable was barely hanging on by a thread. A proper reconnection often fixes the red light. That blinking red LOS light means your router has lost its connection to your internet provider's network. Before you panic or call tech support, there are several simple fixes you can try at home that often solve this problem in minutes. When it's green and steady, everything is fine. However, when it blinks red or stays solid red, it signifies a Loss of Signal, a problem preventing your router from communicating. Understanding LED Indicators on a Fiber Router Let's break down what the common LED lights on a fiber router mean and how they behave: 1. POWER Normal: Solid/stagnant light. If OFF: The router is not powered — check the socket, adapter, or power cable. PON (Passive Optical Network) Normal: Solid. If the LOS light on your fiber router or ONT is blinking red, it usually means Loss Of Signal.
