

The smallest cable tray

Overview

The trays are available in 3-meter (10-foot) segments made by almost all manufacturers. It is one of the magic numbers in the industry. It is lengthy enough to cover a long distance within a short period of time, but short enough to be carried by two people. Outside width will be slightly larger due to side rail thickness—an important detail when coordinating wall or floor penetrations. Height (often called side rail height or tray depth) controls vertical. Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Each cable tray type performs a different function and comes in various materials such as aluminum, galvanized steel, and FRP. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that changing cabling. ect the minimum bend ra-dius for cables as they exit the bottom of the cable tray.
