

Vietnam quality guaranteed butterfly-shaped drop optical cable 2 cores

Summary of Content

The 2-core butterfly-shaped optical drop cable is a high-quality FTTH cable with G657A1/A2 single-mode fibers, LSZH jacket, and robust mechanical performance suitable for indoor and aerial installations.

Cable Structure and Design

The cable features a butterfly flat structure with two single-mode optical fiber units (G657A1 or G657A2) positioned at the center. Two parallel Fiber Reinforced Plastic (FRP) rods are placed on either side of the fiber core to provide strength and stability. The entire assembly is encapsulated in a durable LSZH (Low Smoke Zero Halogen) jacket, creating a flat cross-section that protects the fibers and ensures safety in indoor environments. The cable measures approximately 2x3mm in width and thickness.

Fiber Type and Performance

- Single-mode fibers: G657A1 or G657A2, optimized for low bend sensitivity, ensuring high bandwidth and minimal signal loss in tight installation spaces.
- Optical performance: Loss change ≤ 0.2 dB at 1550 nm after mechanical and environmental tests, with no fiber break or sheath damage.
- Bending radius: Minimum static bending radius of 20 mm and dynamic bending radius of 40 mm, suitable for indoor routing and wall-mounted installations.
