

Waterproof and dustproof network cabinets

Summary of Content

Waterproof and dustproof network cabinets protect IT and telecom equipment from environmental hazards using IP or NEMA-rated enclosures with robust materials and integrated cooling.

Key Features

Protection Ratings:

- IP Ratings: IP54–IP66 are common for dust and water protection. IP54 protects against limited dust ingress and water splashes, IP55 adds low-pressure water jets, and IP66 ensures complete dust tightness and protection against powerful water jets, ideal for outdoor use .
- NEMA Ratings: NEMA 12 enclosures provide indoor dust and drip resistance, including protection from oil and coolant mist, suitable for industrial environments .

Materials and Construction:

- Cabinets are typically made from galvanized steel, stainless steel, or aluminum, offering durability, corrosion resistance, and impact protection .
 - Sealed doors and PUR gaskets prevent dust and water ingress, while brush-sealed cable entries maintain protection without compromising airflow .
- #### Cooling and Ventilation:

- Integrated or optional fans help maintain optimal temperatures, especially in outdoor or industrial settings where heat can accumulate .
