

# What data does the smart display cabinet monitor

## Overview

The display cabinet records real-time data about the condition of the goods in the grocery store, which reduces food waste. Scanners based on micro-chip technology allow the quantity and expiration dates of products to be recorded and monitored without human intervention. Critically it also enables the most vital element of 360 degrees visibility of all the IT system components. SmartCabinet™ customers can effectively manage and plan their IT infrastructure. One of the 2021 winners in the "Best. The SmartCabinet 2-E series of computer room solution products (referred to as SmartCabinet 2-E products for short) are the data cabinet solution products produced by Vertiv Tech Co. 0 kW of scalable cooling capacity while enabling full rack. It can intelligently monitor the temperature and humidity inside the regulated power supply system and display the temperature and humidity values in real time on the monitoring touch screen.
