

# What equipment is included in a fiber optic fusion splicer platform

## Summary of Content

A fiber optic fusion splicer platform typically includes the splicer unit, fiber holders, cleaver, strippers, electrodes, power supply, tube heater, and a carry case with accessories.

### Core Components

- **Fusion Splicer Unit:** The main device that aligns and fuses fiber ends using heat, often with cladding or core alignment technology for precision .
- **Fiber Holders:** Pairs of holders for different fiber types (e.g., FH-70-250 and FH-70-900) to secure fibers during splicing .
- **Fiber Cleaver:** Precision cleaver (e.g., CT-50 or CT-16) to create flat, perpendicular fiber ends for low-loss splicing .
- **Fiber Strippers:** Hand-held strippers for removing protective coatings from fibers, sometimes capable of stripping multiple fibers simultaneously .
- **Electrodes:** Spare electrodes for the splicer's arc mechanism, essential for consistent fusion quality .

### Power and Heating Accessories

- **Battery Pack and AC Adapter:** Rechargeable battery (e.g., BTR-17) and AC power cord for field and indoor operation .
- **Tube Heater:** Device to shrink protective sleeves over the spliced fiber, often faster than previous models for efficiency .
