

What type of power distribution box is used

Summary of Content

Power distribution boxes come in various types based on installation, material, phase, and application, including surface-mounted, flush-mounted, pole-mounted, single-phase, three-phase, lighting, and control distribution boxes.

Classification by Installation and Mounting

- **Surface-Mounted Distribution Boxes:** Installed directly on walls, ideal for retrofits, industrial environments, or areas where easy access is required .
- **Flush-Mounted Distribution Boxes:** Embedded into walls for a clean, aesthetic appearance, commonly used in residential and commercial buildings .
- **Pole-Mounted Distribution Boxes:** Designed for outdoor use, such as street lighting or utility applications, providing weather protection and durability .
- **Wall-Mounted vs Floor-Standing:** Wall-mounted boxes save floor space and are common in homes and offices, while floor-standing boxes are used in industrial or large-scale installations requiring higher load capacity .

Classification by Material

- **Metal Distribution Boxes:** Offer high mechanical strength, impact resistance, and long-term durability, suitable for industrial and commercial applications .
- **Plastic Distribution Boxes:** Lightweight, corrosion-resistant, and easier to handle, often used in residential or light commercial settings .

Classification by Electrical Phase
