

Where in Jordan can I buy a beam splitter

Summary of Content

Beam splitters can be purchased in Jordan through international suppliers like Edmund Optics, Thorlabs, and DigiKey, which offer shipping to Jordan, or by contacting local scientific equipment distributors.

International Suppliers

- Edmund Optics – Offers a wide range of beam splitters including plate, cube, pellicle, and polarizing types with various coatings for UV, visible, and IR light. They provide online ordering and international shipping, which can include Jordan (check shipping options at checkout) .
- Thorlabs – Provides plate and cube beam splitters, polarizing and non-polarizing, suitable for laser and optical experiments. Orders can be placed online, and Thorlabs supports international shipping .
- DigiKey – Stocks a large selection of optical components including beam splitters. They offer same-day shipping and international delivery, making it convenient for customers in Jordan .
- RP Photonics Supplier Directory – Lists over 190 suppliers of beam splitters worldwide. You can filter suppliers that ship internationally or contact them directly to inquire about delivery to Jordan .

Local Options

While specific Jordan-based stores are not listed in the web results, you can explore:

Article Content

How Does a Beam Splitter Work? Types, Principles & Applications

Learn how beam splitters work, compare cube and plate designs, and explore applications in lasers, microscopy, and interferometry.

What is a Beam Splitter: Types And Applications

A beam splitter is a device used to separate or combine light. It is widely used in guiding

Optical Beamsplitters | Beamsplitter Selection | Edmund Optics

Find top-quality Beamsplitters for laser systems & more. Shop a variety of beamsplitters at Edmund Optics for precision light splitting

What are Beamsplitters? Step by Step Guide to Transparent Mirrors

From holograms, to teleprompters, to robotics, you'll find beam splitters at the root. Dive into our comprehensive guide to help you DIY!

Beam splitter-AliExpress

This article explains what a beam splitter is, how it functions in optical systems, and how to select the right type based on

Beam Splitters - optical power splitter, beamsplitter, thin-film ...

What are Beam Splitters? A beam splitter (or beamsplitter, power splitter) is an optical device which can split an incident light beam

Beamsplitters

Beam splitters separate a beam of light by wavelength, power, or polarization into two orthogonal beams. The properties of the

Beam splitter, Beamsplitter

Find your beam splitter easily amongst the 61 products from the leading brands (DAHENG OPTICS,

Beam Splitters

Multiple-Wavelength Beam Splitters FOR THE SIMULTANEOUS PROCESSING OF LIGHT OF DIFFERENT WAVELENGTHS Multi

How does a beam splitter work? Common types and use cases

Understanding Beam Splitters Beam splitters are essential optical components used to divide a beam of light into two

Beam Splitters: Explained

Beam splitters are a fundamental element in optical systems. Beam splitters are, in essence, optical components used

Beam Splitter Selection Guide

Newport offers a wide variety of Beamsplitters in various shapes. Circular beamsplitters, plate beamsplitters and cube beamsplitters

Plate Beamsplitter

Our standard beamsplitters are designed to provide general purpose laser beamsplitting and combining for visible through near

Optical beam splitter, Optical beamsplitter

Find your optical beam splitter easily amongst the 41 products from the leading brands (COHERENT,

42 Beamsplitter Manufacturers in 2026

What Is a Beamsplitter? A beamsplitter is an optical element used to separate a single beam (the speed of light) into two beams.

Thorlabs · Optical Beamsplitters

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam

Beam splitter | Description, Example & Application

Beam splitters are commonly used in scientific experiments, optical systems, and imaging applications. They are

Beam Splitters and Combiners — FindLight

Browse Beam Splitters and Combiners for fiber-optic light transport. Compare specs, vendors, and request quotes directly on FindLight.

Beam splitter

A beam splitter or beamsplitter is an optical device that splits a beam of light into a transmitted and a

Bluebeam Authorized Resellers

Find a local partner that understands your unique business and industry needs. Use the Bluebeam Partner Locator to find resellers,

Beam Splitters - Buyer's Guide & Supplier List | RP Photonics

This buyer's guide for beam splitters provides technical background, comparison of major types, selection criteria, and an overview of

Store Locator – Beam

Wellness, redefined. The highest-quality functional wellness products for better sleep, wellness, performance, and nutrition.

Optical Beamsplitter

A beamsplitter is an optical component used to split a beam of incident light into two parts in a laser or illumination system. Cube

How to Select a Beamsplitter

What is a Beamsplitter? A beamsplitter is an optical device that divides an incident beam of light into two parts: one part is

Shop Beam Splitters & Passive Optical Splitters

Explore our collection of optical cable splitters and PON splitters for sale. Optical beam splitters are used to split the fiber optic light

Beamsplitters | Optics | DigiKey

Shop DigiKey's large in-stock selection of Beamsplitters. View inventory, pricing and order now for same day shipping!

Understanding Beamsplitters: Types, Principles, and Applications

A beamsplitter is an optical device capable of splitting an incident light beam into two. These tools can split both laser

Beam Splitter Manufacturers

A Beam Splitter is an optical device that splits a beam of light into two or more beams. The leading manufacturers of Beam Splitters
