

Wipeable optical power meter red light

Overview

This device can increase the function of the red light source, and it is an ideal device for quick and easy solution to the problems of both optical and red light sources.

●The machine can test 7 wavelengths, and can be used with any light source. ●It can add red light source and. The Y3 All-in-One Optical Power Meter with Red Light Pen integrates two vital fiber optic test functions in one compact handheld device — precise optical power measurement and visible fault location using a red laser pen. Compatible with SC/FC interface, easy to operate. Our 1936-R/2936-R series boasts state-of-the-art analog boards with a whopping 250. This handheld mini optical power meter Allgriit TM530 has an RJ45 cable sequence function that allows you to accurately measure the network connection sequence up to 300 metres. It is used by technical staff across every industry sector.
